

Quite suddenly, CMC announced the Neuheiten (new models) for 2024 this morning. You will find them on the attached list.

Most important news:

~8 versions of the Ferrari LM (Lemans), plus 2 specials (M-269/270). These are expected from the 4th q  
~reissue of the Transporters M-084 (Ferrari) and M-097 (Maserati), which have been adjusted/improved  
(see Press release from page 3).

The list also includes the models which currently are in stock.

I have some of them in stock myself, the rest I order from CMC. In that case the delivery time is slightly

CMC accepts orders in order of receipt. Of course I have already pre-ordered some things.

I look forward to receiving your orders at (very) short notice, but no later than Feb. 3<sup>rd</sup>.

You do not need to confirm pending orders this time, because the prices will not be increased.

These orders will be maintained at the applicable price.

I would love to hear from you.

The Press release is also available in German.

Kind regards,  
Henk ten Cate
